4+ years experience

PROFILE

I own product strategy and delivery end to end — discovery, specs, backlog, release — and I can read the codebase the team is arguing about. 4+ years of product and project execution across fintech, e-commerce and SaaS, a fractional-ownership investment platform at Solivest, and digital banking and payments at WayaLinks.

The work I'm best at sits in the gap between a business objective and an acceptance criterion: taking a complex payment or financial workflow and turning it into something engineering can build without a second meeting.

MEASURED IMPACT

BY OUTCOME

EXPERIENCE

Jul 2026

Present

CONTRACT ·
CURRENT

WayaLinks Ltd

Technical Product Engineering Manager · Nigeria

- Own technical product strategy and engineering delivery across fintech products, translating business objectives into requirements, technical priorities and execution plans.
- Currently specifying payment and digital banking workflows into user journeys and acceptance criteria, and managing backlog, sprint priorities and cross-team dependencies across product, engineering and design.

FULL-TIME

SOLIVEST Technologies Ltd

Product & Project Manager · Lagos, Nigeria

- Led end-to-end product and project execution on a fractional-ownership investment platform, lifting user adoption **40%** through redesigned product flows.
- Owned the full product lifecycle — requirements, sprint planning, backlog prioritisation and release strategy — across engineering, design, compliance and marketing.
- Implemented structured design-to-development workflows that cut delivery cycles **30%** and removed most hand-off rework between design and engineering.
- Ran user research and A/B tests on onboarding, improving task completion and shortening time-to-first-investment for new users.

FREELANCE

Independent Consulting
Product & Project Consultant · Remote

- Managed 10+ digital products from concept to launch for startups and SMEs — scoping, roadmap, delivery and post-launch iteration.
- Optimised an e-commerce checkout flow, reducing cart abandonment **7%**.
- Built MVPs, internal systems and documentation frameworks that standardised how distributed teams planned, tracked and shipped work.

2024

ENGINEERING

Adroit Solutions Ltd
Web Developer · Nigeria

- Built secure, scalable interfaces in a banking/IT environment, collaborating with cross-functional teams on functional, user-friendly systems.

CAPABILITIES

WHAT I DO / WHAT I USE
